

BOT CHAIN NATIVE

Invoxa

Invoice. Get paid. Prove it.

An on-chain invoicing and payment platform for freelancers, creators, developers, and businesses.

The Problem

02

The current workflow creates friction for users, teams, and communities.

- **Challenge 1**

Traditional crypto invoicing is fragmented across messages, spreadsheets, and wallet transfers.

- **Challenge 2**

Clients often lack a clean payment experience with invoice details, due dates, and verification.

- **Challenge 3**

Freelancers and businesses spend time manually matching wallet payments to invoices.

- **Challenge 4**

Payment records and receipts are difficult to organize and share.

The Solution

03

An on-chain invoicing and payment platform for freelancers, creators, developers, and businesses.

Create

Create professional invoices with client, amount, description, and due date.

Connect

Share a payment link or QR code for direct wallet payment.

Automate

Automatically track payment status using on-chain transactions.

Verify

Generate verifiable receipts and maintain invoice history.

Core Features

04

A focused MVP designed around the product's core workflow.

Invoice creation

Designed for a simple, transparent on-chain user experience.

Payment links & QR

Designed for a simple, transparent on-chain user experience.

Automatic payment status

Designed for a simple, transparent on-chain user experience.

Receipt generation

Designed for a simple, transparent on-chain user experience.

Invoice history

Designed for a simple, transparent on-chain user experience.

Shareable invoice pages

Designed for a simple, transparent on-chain user experience.

Who It Is For

Designed for practical adoption across the BOT Chain ecosystem.

Freelancers & Creators

Invoxa gives freelancers & creators a simpler way to use its core on-chain workflow.

Developers & Agencies

Invoxa gives developers & agencies a simpler way to use its core on-chain workflow.

Web3 Businesses

Invoxa gives web3 businesses a simpler way to use its core on-chain workflow.

Ecosystem Projects

Invoxa gives ecosystem projects a simpler way to use its core on-chain workflow.

Why BOT Chain

06

BOT Chain's EVM-compatible infrastructure supports fast, low-cost on-chain applications.

- **Benefit 1**

Fast, low-cost settlement for invoice payments.

- **Benefit 2**

Transparent transaction records make payment verification simple.

- **Benefit 3**

EVM compatibility supports familiar wallet and smart-contract tooling.

- **Benefit 4**

A practical payment utility that can bring recurring business activity on-chain.

Current Status & Roadmap

07

Focused on shipping, validating, and refining the product on BOT Chain Testnet.

01

MVP

Core invoicing and payment experience.

02

Testnet

Deploy contracts and validate payment flows on BOT Chain Testnet.

03

Refine

Improve transaction handling, receipts, dashboards, and UX.

04

Adoption

Onboard freelancers, businesses, and ecosystem teams.

What We Want From BOT Chain

08

Co-marketing and ecosystem support can help accelerate early adoption.

- 1 Highlight Invoxa across BOT Chain social media channels.
- 2 Feature Invoxa on the BOT Chain website and ecosystem/project directory.
- 3 Connect Invoxa with freelancers, creators, businesses, and ecosystem projects.
- 4 Amplify Invoxa testnet launch, product updates, and major milestones.
- 5 Collaborate on campaigns that showcase practical on-chain invoicing and payments.

Invoxa

Invoice. Get paid. Prove it.

An on-chain invoicing and payment platform for freelancers, creators, developers, and businesses.
